McPherson County Health Department Director and McPherson County Health Officer

September 10, 2020

CORONAVIRUS DISEASE (COVID-19) IN MCPHERSON COUNTY

McPherson County Health Department reports 238 total confirmed cases of coronavirus disease (COVID-19) in McPherson County. 198 of the total confirmed cases have now met recovery guidelines set forth by the KDHE. There are four current hospitalizations and one death.

- Positive case #232 is a symptomatic female in her 20s with unknown exposure and was identified late Wednesday, September 9th.
- Positive case #233 is a symptomatic male in his 80s with unknown exposure, is hospitalized, and was identified late Wednesday, September 9th.
- Positive case #234 is a symptomatic female in her 70s with unknown exposure, is hospitalized, and was identified late Wednesday, September 9th.
- Positive case #235 is a symptomatic 18-year-old male with unknown exposure.
- Positive case #236 is a symptomatic male in his 60s with suspect travel exposure and family exposure (family of 226).
- Positive case #237 is an asymptomatic female in her 60s with suspect travel exposure.
- Positive case #238 is a symptomatic male in his 40s with known exposure.

McPherson County Health Department is working closely with key partners to evaluate the upcoming school year. It is our goal to continue to keep the community informed. The percent of positive cases out of how many McPherson County residents were tested during a 14-day period will facilitate MCHD recommendations. Criteria that will influence the recommendation to move schools to more or less restrictive measures can be found on mcpersoncountyks.us on the home page, under "COVID-19: Reopening McPherson County." MCHD is working on adding more data to our daily releases soon. Data that is currently available includes:

- June 29 to July 12: 5.47% positive rate
- July 13 to July 26: 11.49% positive rate
- July 27 to August 9: 12.64% positive rate
- August 10 to August 23: 8.62% positive rate
- August 24 to September 6: 14.5% positive rate
 - This number is likely to change as more test results for this time period are reported to MCHD.

KDHE and MCHD continue to mandate a 14-day home quarantine for Kansans if you have done any of the following:

- Attended/traveled to a mass gathering event (out-of-state) of 500 people or greater where individuals did not 6-foot distance and wear masks on or after August 11.
- Traveled to Aruba August 27 to September 10.
- Traveled on a cruise ship or river cruise.
- Traveled July 14 to August 27 to countries with a CDC Level 3 Travel Health Notice with Restrictions on Entry into the United States, including China, Iran, European Schengen area, United Kingdom, Republic of Ireland and Brazil.

McPherson County is in Phase 3 of Reopening Kansas. Updated documents can be found on mcpersoncouthyks.us on the home page, under "COVID-19: Reopening McPherson County." McPherson County Health Department recommends McPherson County remains in Phase 3 at least until September 14th, 2020. This decision extends Phase 3 again by two incubation periods and is based off the number of positive cases with unknown exposure and the continuous increase in new cases. The Health Department will continue to evaluate the threat COVID-19 poses on our communities.

McPherson County residents are encouraged to help slow the spread of coronavirus by:

- Following Phase 3 of Reopening Kansas and McPherson County (mcpersoncountyks.us).
- Maintaining social distancing.
- Avoiding gatherings in groups greater than 45-persons.
- Wearing cloth face coverings or homemade masks when in public.
- Practicing cough etiquette and washing hands with soap and water for at least 20 seconds.
